Your local window manufacturer  
with over 30 years experience.

Manufacturers of quality aluminium & western red cedar windows, french, hinged, sliding, stacker & bifold doors, stainless view & security screens, pivot shower screens, mirrors, glassblocks, semi commercial & fixed windows.

## sliding windows

The latest in technical design has been incorporated into the Statesman Series MK VI Sliding Windows. This is the most popular style Statesman window as it lends itself to any situation.

Running on strong nylon rollers, it has a beautiful smooth horizontal sliding action. The self locking catch is height adjustable and can be raised or lowered to a convenient position.

The window has a wide self-draining sill, the internal baffle prevents bowl-back and the sliding panel, when unlocked, can be removed for easy cleaning of all glass surfaces.

Flyscreens easily fitted from inside. No clips or buttons to break.

### STANDARD SIZE RANGE

These window sizes are a guide only. Special sizes are charged at the nearest standard size.

There is no surcharge for special size windows.

Windows to suit all categories

External flange or centre fin

Two Day supply only

Windows 52mm wide (compare others)

Polywrap for protection during construction if required

Centre opening windows available in all SFS size ranges

All window types can be fitted with colonial bars, midrails, security screens, ventlocks, timber reveals, subframes and building lugs where required.

## double hung windows

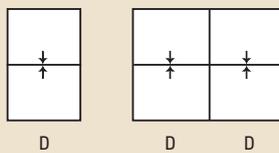

The smooth vertical sliding action plus the ability to open the top and bottom sashes for added air circulation makes the Statesman Series 205 Double Hung Window very popular. A good looker in any part of the home.

Aluminium bars are available to transform windows into the colonial style.

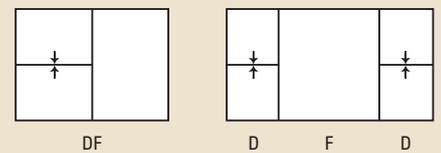

The Statesman Series 205 Double Hung Window offers continuous smooth, uniform sash operation, through the concealed spring balances. Jamming and rattling are eliminated and the aluminium sections cannot warp or shrink.

DH go to 2100 in height as a single unit and as in the Sliding Window fixed lites can be fitted either horizontally or vertically to give a wide choice of sizes and combinations, e.g. FDF, FD, DF etc.

### BASIC DESIGNS

### CAN BE LH OR RH

Overall window sizes are the same for the Double Hung as for MK VI Sliding Windows on the opposite page.

205 Windows can be made in the Double Hung, e.g. both sashes move up and down (flyscreens fit to full height of window security

locks cannot be fitted), or in the Single Hung type which means only the bottom sash moves up and down, the top sash is fixed in position and flyscreens fit to half the window. Security locks can be fitted. Double Hung are designated DH and Single Hung SH.

## awning windows

The pleasing appearance and excellent performance of the Statesman Series 2 Awning Window combine to withstand the harsh Australian climatic conditions. They are weatherproof to protect interiors from rain, wind and dust.

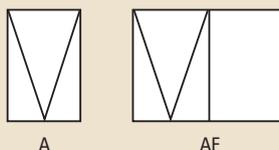

The unique advantage of the Statesman Series 2 awning Window is the ability to control ventilation by the simple in-and-out movement of the sash.

Increasing in popularity each year, this awning style opens outward from the bottom and gives an uninterrupted view from inside and an elegant look from outside.

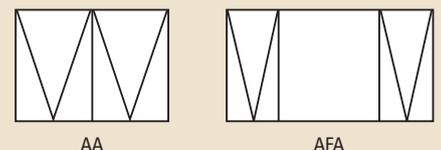

Overall window sizes are the same for Awning as for MK VI Sliding Windows on the opposite page.

### BASIC DESIGNS

### CAN BE LH OR RH

Awnings go to 1800 high as a single unit. As in Sliding and Double Hung, fixed lites can be fitted either horizontally or vertically to give a wide choice of sizes and designs.
